

NX-1814E-GR

Slimline Voice LED keypad with touch buttons - black/horizontal (Greek)

General

The NetworX Slimline Voice LED keypad brings together powerful protection and user-friendly features in a compact design. Individually lit, colour-coded Touch Response Keys and a Personal Voice Guide (PVG) that provides step-by-step instruction for all system functions make this keypad simple and easy to program and control. Users can record their own names for different system components and leave voice messages for others, while voice-enabled status keys eliminate the need to decipher confusing flashing lights. Intercom functionality allows users to talk with each other from up to eight different locations around the premises.

Interactive Personal Voice Guide (PVG)

Imagine someone walking you through every step of using your security system and intercom.

Advanced Touch Interface with voice-enabled status keys

Touch response keys, colour-changing status keys and individually lit smartkeys work for you, making it one of the most intuitive security systems to use.

The voice enabled status keys make it easy to check your security system without a manual.

Modern Architectural Design

Slimline keypad (<16 mm) complements your home's décor with a contemporary appeal.

Easy-to-use menus for advanced features

Easy-to-use menus allow you to see, hear and use all the advanced security features.

Intercom functionality

Talk to your family and friends in up to 8 locations around your home, with Monitor Mode, Privacy Mode and Auto-Answer features.

Customizable Voice Recording

Record your own names for different parts (zones, partitions, outputs) of your security system. Now it's easy to make use of all the security locations around your home. You can even leave voice messages (memos) for family and friends that play back when they leave or return home.

Standard Features

- Compatible with NetworX control panels (as of version 2)
- Interactive Personal Voice Guide (PVG)
